

Third Quarter Report 2012

January 1 to September 30, 2012

Audi Group maintains successful performance

ECONOMIC DEVELOPMENT

The global economy's growth gradually lost momentum over the first nine months of fiscal 2012. Industrial countries in particular expanded only minimally. While the economy in the United States grew moderately, the enduring recessionary tendencies especially in certain Western European national economies weighed on global economic development. Most emerging economies moreover saw growth dwindle over the first three quarters, even if the rates of growth that they achieved were comparatively high.

This mixed economic performance was also reflected in worldwide demand for cars over the period under review. While demand for passenger cars in Western Europe declined, the other sales regions enjoyed a rise in new registrations. The car markets in North America and the Asia-Pacific region even achieved double-digit growth. By contrast, there was a slight dip in new-car registrations in Germany over the first nine months of the year compared with the previous year, to 2.36 million vehicles. Sales in Southern European markets as well as France and Belgium decreased significantly.

On the other hand, demand in the United States continued to make positive progress. From January through September, 14.5 percent more new passenger cars and light commercial vehicles were registered compared to the prior-year period. The Chinese automotive market, too, continued to expand. With 7.7 percent more vehicles sold than in the prior-year period, there was nevertheless a slight slowdown in the rate of growth.

PRODUCTION

The Audi Group increased vehicle production by 13.9 percent in the first three quarters of 2012, to the new record total of 1,143,256 (1,004,089) cars. This figure includes 253,412 (195,230) Audi vehicles built by the Chinese joint venture FAW-Volkswagen Automotive Company, Ltd. in Changchun (China). Overall, 1,141,659 (1,003,005) vehicles of the Audi brand and 1,597 (1,084) supercars of the Lamborghini brand were produced.

At Group headquarters in Ingolstadt, the Company manufactured 430,777 (450,475) vehicles from January through September. The increase in the number of vehicles built at the Neckarsulm plant to 211,618 (192,726) units is mainly attributable to the wider range of A6 models in production. In all, 4,850 (3,360) parts sets for CKD assembly at Aurangabad (India) were made at the Ingolstadt, Neckarsulm and Bratislava (Slovakia) sites.

CAR PRODUCTION BY MODEL

	1-9/2012	1-9/2011

Total, Group ¹⁾	1,143,256	1,004,089

1) Incl. vehicles built in China by the joint venture FAW-Volkswagen Automotive Company, Ltd.

AUDI HUNGARIA MOTOR Kft. built 28,303 (33,474) cars at its Győr plant in Hungary over the past nine months. This total comprised 18,331 (21,147) sports cars of the TT car line and 9,972 (12,327) Audi A3 models. The early part of 2012 saw the Hungarian company celebrate the topping-out ceremony for the new automotive plant, where a further model of the A3 car line will be built from 2013.

AUDI BRUSSELS S.A./N.V., Brussels (Belgium), produced 97,489 (88,858) vehicles of the Audi A1 car line in the period under review.

In addition, the Volkswagen Group locations in Bratislava (Slovakia) and Martorell (Spain) built 42,598 (39,560) units of the Audi Q7 and 77,521 (2,682) of the Audi Q3 respectively in the first three quarters of the current fiscal year.

The Chinese joint venture FAW-Volkswagen Automotive Company, Ltd., Changchun, produced a total of 253,412 (195,230) Audi vehicles between January and September 2012.

ENGINE PRODUCTION

	1-9/2012	1-9/2011
Audi Group	1,476,301	1,408,907
of which AUDI HUNGARIA MOTOR Kft.	1,475,631	1,408,747
of which Automobili Lamborghini S.p.A.	670	160

The first three quarters of 2012 saw the Audi Group step up engine production by 4.8 percent to 1,476,301 (1,408,907) units.

DELIVERIES

The Audi Group achieved a worldwide delivery volume of 1,234,835 (1,134,811) cars in the first nine months of the current fiscal year. This total included 1,097,540 (973,154) vehicles of the core brand Audi – an increase of 12.8 percent. The Lamborghini brand enjoyed a substantial 42.4 percent rise in deliveries to 1,541 (1,082) supercars. Deliveries of other Volkswagen Group brands came to 135,754 (160,575) vehicles.

Throughout Europe, the Audi brand recorded a delivery volume of 574,125 (551,925) vehicles over the first three quarters of 2012, bettering the previous year's already high level by 4.0 percent. However, the Audi brand was not altogether able to stave off market downturns – some of which were significant – in Italy and Spain; both of these countries have been affected quite badly by the sovereign debt crisis. On the other hand, its overall deliveries in the Western European export markets of the United Kingdom and France were up on the position of the prior year.

In the home market of Germany, the volume of deliveries was increased by 7.4 percent to 198,777 (185,022) automobiles in the period under review, despite a slight drop in the overall market.

Demand for automobiles of the Audi brand also made very healthy progress in the U.S. market in the first nine months of the 2012 fiscal year. The total number of vehicles delivered there was up 18.5 percent at 100,694 (84,981) cars.

In the Asia-Pacific region, the Company increased its volume of deliveries by 29.1 percent to 351,426 (272,189) cars of the Audi brand in the first three quarters of fiscal 2012. Foremost among the factors driving this growth was continuing high demand in the Chinese market (incl. Hong Kong). In contributing 297,060 (226,010) vehicles, the volume of deliveries there was a substantial 31.4 percent up on the previous year.

DELIVERIES OF CARS TO CUSTOMERS BY MODEL 1)

¹⁾ The figures for the prior-year period have been marginally adjusted.

PRODUCT RANGE STRENGTHENED

The Audi Group maintained the steady development and expansion of its product range over the first nine months of 2012.

For example, the updated models of the A4 car line were launched at the beginning of the year. The A4 Sedan, A4 Avant, A4 allroad quattro and S4 models are especially notable for their innovative drivetrain, chassis and infotainment solutions. In February 2012, the A1 family gained a five-door version in the shape of the A1 Sportback, followed by a range-topping A1 quattro version in June 2012 in a limited edition of 333 units.

The first half of the year saw the Audi brand add the A6 hybrid full-size sedan and the A8 hybrid luxury sedan to its range of hybrid models; both of these new versions are capable of running exclusively on their combustion engine or electric motor, or on a combination of both in the hybrid mode.

In the second quarter of 2012 the brand with the four rings broadened its range of products in the A6 car line. Dealers in China have been supplied with the new Changchun-built Audi A6L since April 2012. The new A6 allroad quattro has gradually been rolled out in the markets since May 2012.

The thrilling top models of the TT car line, the sporty TTRS plus Coupé and TTRS plus Roadster, have been on sale since April 2012. The new RS 5 Coupé, which is noted in particular for its outstanding performance and sharper design, has likewise been available since April 2012. The new Audi A3, which made its debut at the Geneva Motor Show, has been available since late summer. The third generation of this car line has a compellingly sporty, progressive design with coupe-like styling; its driver assistance systems and infotainment redefine the benchmark in the premium compact car segment.

Another model showcased in Geneva was the ultra-sporty RS4Avant, which has been on the market since this fall.

The updated Audi Q5 made its debut at the Auto Mobil International (AMI) in Leipzig before going on sale to customers in late summer 2012. The Q5 car line will be completed in early 2013 with the new SQ5 TDI model, which was premiered at the 24 Hours of Le Mans in June 2012.

In July 2012, Audi unveiled the updated Audi R8 at the Moscow Motor Show. The new top model will reach its first customers at the end of the year. July 2012 also saw Audi add the sporty S6, S6 Avant and S7 Sportback models as well as the new S8 luxury sedan to its range of full-size cars.

Audi took the wraps off the new A3 Sportback at the Paris Motor Show in September 2012. Thanks to innovative lightweight construction technology, the weight of the compact five-door model was reduced by as much as 90 kilograms compared with the previous version. Besides featuring powerful and highly efficient engines, the new A3 Sportback follows the pattern established by the three-door A3 in offering luxury-standard infotainment and driver assistance systems. Audi also presented the new S3, which is both more powerful and more efficient in its third generation. Thanks to its 2.0 TFSI turbocharged engine with gasoline direct injection, this lightweight premium compact model that will go on sale at the start of 2013 combines powerful performance with minimal fuel consumption. With a power output of 221 kW (300 hp) and 380 Nm of torque, the S3 with S tronic accelerates from 0 to 100 km/h in 5.1 seconds. Audi also showcased the new RS 5 Cabriolet at the Paris Motor Show in September 2012. The four-seater with soft top represents a unique combination of elegance and power. Its 4.2 FSI engine develops 331 kW (450 hp) and accelerates the high-performance sports model from 0 to 100 km/h in 4.9 seconds.

Audi is providing a foretaste of things to come with its Audi crosslane coupé concept car, which was presented at the Paris Motor Show for the first time. This vehicle incorporates exciting features such as a removable roof and a wide range of infotainment and communication functions. Thanks to its innovative plug-in hybrid drive based on a purpose-designed 1.5-liter three-cylinder TFSI engine and two electric motors, the Audi crosslane coupé redefines the benchmark, with fuel consumption of only 1.1 liters per 100 km and $\rm CO_2$ emissions of just 26 g/km.

FINANCIAL PERFORMANCE

The Audi Group's successful business performance is reflected in its financial performance, net worth and financial position.

The Audi Group increased its third-quarter revenue for 2012 by 15.7 percent to EUR 12,645 (10,869) million. The operating profit was virtually on a par with the previous year's high level at EUR 1,327 (1,420) million. The operating return on sales was 10.5 (13.1) percent. From January through September 2012, the Audi Group increased its revenue by 16.3 percent to EUR 37,667 (32,394) million and its operating profit by 6.1 percent to EUR 4,203 (3,960) million. Costs rose primarily as a result of increased volume but also on account of the introduction of numerous new models, the realization of strategic market development programs and extensive research and development activities in the first three quarters. Positive exchange rate effects and continuous optimizations with regard to productivity and processes had a positive impact on the profit.

With an operating return on sales of 11.2 (12.2) percent, the Audi Group remains one of the most profitable companies in the automotive industry worldwide.

In March 2012, a subsidiary of AUDI AG acquired a 30 percent share in Volkswagen Group Services S.A., Brussels (Belgium), which the Audi Group accounts for using the equity method. In May 2012, psw automotive engineering GmbH, Gaimersheim, and Audi Akademie GmbH, Ingolstadt, were furthermore fully consolidated within the Audi Group retroactively with effect from January 1, 2012.

Effective July 19, 2012, AUDI AG acquired a 100 percent share in the motorcycle manufacturer Ducati Motor Holding S.p.A., Bologna (Italy), via its subsidiary Automobili Lamborghini S.p.A., Sant'Agata Bolognese (Italy), thus widening the group of consolidated companies. In August 2012, Audi Tooling Barcelona, S.L., Barcelona (Spain), joined the group of consolidated companies and was fully consolidated within the Audi Group retroactively with

Effective May 1, 2012, AUDI AG sold off its 100 percent share in Audi Retail GmbH, Ingolstadt, to a subsidiary of Volkswagen AG, Wolfsburg. Audi Retail GmbH and its previously consolidated subsidiaries are thus no longer included in consolidation by AUDI AG. The effects on the financial performance, net worth and financial position of the Audi Group are of lesser significance.

WORKFORCE

The workforce of the Audi Group increased to an average of 66,630 (62,462) employees in the first nine months of 2012. This rise was attributable above all to new employees taken on in the context of Audi's growth strategy. In addition, an average of 2,198 (2,171) young people were engaged as apprentices at AUDI AG in the year to September 2012.

PERSONNEL CHANGES

effect from January 1, 2012.

The Supervisory Board members Dr. Bruno Adelt and Dr. Franz-Josef Paefgen surrendered office with the close of the 123rd Annual General Meeting of AUDI AG on May 10, 2012. They were succeeded by Dr. Christine Hawighorst, Secretary of State, and Dr. Wolfgang Porsche. As part of a comprehensive structural and human resources review by the Volkswagen Group, the following personnel changes on the Board of Management of AUDI AG were approved by the Supervisory Board and implemented effective September 1, 2012:

Wolfgang Dürheimer took charge of Technical Development from Michael Dick. At the same time Luca de Meo was appointed to the Board of Management as Board Member for Marketing and Sales, succeeding Peter Schwarzenbauer. Dr. Bernd Martens took over from Ulf Berkenhagen as Board Member for Procurement.

RISK REPORT

The risk situation of the Audi Group is registered, evaluated and analyzed across all divisions using the risk management system. This also identifies the appropriate risk management instruments in the form of corrective action and checks, monitors their implementation and effectiveness, and also initiates further measures where necessary.

As a globally active car manufacturer, the Audi Group is exposed to industry-typical risks. These are explained in detail in the 2011 Annual Report and still remain valid.

In addition, considerable uncertainty continues to be the dominating feature of the global economy. The sovereign debt crisis in Europe is likely to prompt the countries affected to take growth-impeding economy measures and could also influence demand for cars.

There may be other risks to growth for the Audi Group from the impending expiry of economic stimulus measures in the United States and the weaker rate of growth in the Chinese economy.

OUTLOOK

The Audi Group expects the slightly weaker growth pattern of the first nine months to be a feature of the global economy for the remainder of 2012. It is to be expected that the stimulus measures initiated by various industrial and emerging economies will not yet translate into any positive stimulus for growth before the end of the fiscal year. All in all, considerable uncertainty still surrounds the development of the global economy. To a large extent, the continuing growth of the global economy will depend especially on how the sovereign debt crisis in the eurozone and the United States is handled, and also on China's rate of growth.

The Audi Group believes that worldwide demand for automobiles for 2012 as a whole will be positive. With the exception of Western Europe, all major sales regions are likely to report a year-on-year rise in unit sales.

The Audi Group plans to deliver over 1.4 million Audi brand vehicles to customers in the 2012 fiscal year. The newly launched Audi A1 Sportback, the Audi Q3 and the new Audi A3 are the main drivers of demand. The Audi Group also expects this growth in deliveries to produce higher revenue. Provided the economic framework does not change significantly, the operating profit should be on a par with the previous year despite increased expenses for new products, technologies and expanded production structures alongside more intensive competition.

EVENTS OCCURRING AFTER THE BALANCE SHEET DATE

There were no reportable events of material significance after September 30, 2012.

DISCLAIMER

This Third Quarter Report contains forward-looking statements relating to anticipated future developments. These statements are based upon current assessments and are by their very nature subject to risks and uncertainties. Actual outcomes may differ from those predicted in these statements.
