

Japanese

The Japanese font does not offer a separate “extended” style. For this reason, only two type weights are used in Japanese typesetting, each of which is available in TrueType and OpenType versions.

Generally speaking, this font may only be used for Japanese typesetting. The Latin letters included may never replace Audi Type.

- > DFPHSGothic-W3 (TrueType) corresponds to the Audi corporate typeface in the type weights Roman and Extended Roman.

おオクテワ
匠虫竿蠅鋤馴

- > DFPHSGothic-W7 (TrueType) corresponds to the Audi corporate typeface in the type weights Bold and Extended Bold.

おオクテワ
匠虫竿蠅鋤馴
