Audi Dialog 2020
January 28 and 29, 2020
Audi Conference Center, Munich Airport

Documentation
Our Vision:

Unleash the Beauty of Sustainable Mobility

Sustainable mobility means:

› We will offer carbon-neutral premium mobility on a long-term basis.
› We will offer the strongest lineup of electric models among the premium competitors over the medium-term.
› By the middle of the coming decade, we will sell around one million electrified cars per year.
› By 2025, we will reduce the corporate carbon footprint of the Audi fleet by around 30% over the entire life cycle. As a result, we will improve the ecological balance.
› We want the entire company to be completely carbon-neutral by 2050 at the latest.

Our Mission:

Consistently customer
Consistently electric
Consistently connected
Consistently sustainable

WHAT:

Consistently team
Consistently focused
Consistently synergetic
Consistently profitable

Audi Dialog 2020 took place in the context of the company strategy, which was newly decided in 2019. Audi has formulated a clear vision here: The company wants to have a neutral carbon footprint by 2050. Responsible handling of resources, expansion of sustainable electric mobility, and many further measures make a key contribution when it comes to acting consistently more sustainably.
We Actively Involve Our Stakeholders in Central Issues.

We do so by using a variety of dialog formats, one-to-one discussions, and other means of communication.
Audi Dialog 2020 Continues the Tradition of a Trusting, Constructive Exchange with Our Stakeholder Groups.

Neighborhood dialogs, Neckarsulm
For over ten years: Regular exchange with people living close to the plant premises

Audi Stakeholder Forum 2012, Ingolstadt
Strategic expectations and requirements of corporate responsibility

Audi Stakeholder Forum 2014, Berlin
Connected vehicles – how will Audi shape the future of mobility?

Audi Dealer Dialog 2016, Ingolstadt
Sustainability at Audi and our expectations of the dealers and their expectations of us

International Audi Stakeholder Forum 2016, Puebla
Regional responsibility at the Puebla location

Audi Stakeholder Forum 2017, Ingolstadt
The Region in Dialog – Social Commitment

Audi Stakeholder Forum 2018, Berlin
Sustainable electric mobility

Audi Dealer Dialog 2016, Ingolstadt
Sustainability at Audi and our expectations of the dealers and their expectations of us

Audi Stakeholder Forum 2018, Ingolstadt
Regional responsibility at the Puebla location

Audi Stakeholder Forum 2018, Ingolstadt
The Region in Dialog II

Audi Dialog 2020
January 28 and 29, 2020
Audi Dialog 2020 took place in the form of four thematically focused round tables with stakeholders from relevant professions.

Day 1: January 28, 2020

**Charging Infrastructure**
8:30 a.m. to 1:00 p.m.

**Digital Responsibility**
1:30 p.m. to 6:00 p.m.

Day 2: January 29, 2020

**Human Rights**
8:30 a.m. to 1:00 p.m.

**Circular Economy**
1:30 p.m. to 6:00 p.m.

**Motivation:**
Audi is consistently advancing the topic of sustainable mobility on many levels. For the continuous development of our sustainability strategy, an honest assessment and an outside view are essential.
Summary

1. Charging Infrastructure
2. Digital Responsibility
3. Human Rights – Complaints Mechanisms
4. Circular economy
1. Charging Infrastructure
The Program at a Glance

<table>
<thead>

</thead>
</table>
| **Welcome, presentation, and thematic introduction** | Josef Schön, sustainability corporate strategy, AUDI AG  
Frank Sprenger, fors.earth |
| **Group discussion** | |
| **Audi Insights: Home charging solutions and public charging infrastructure** | Anno Mertens and Martin Dehm, AUDI AG |
| **Introduction of work orders and distribution of groups** | |
| **Break** | |
| **Work phase in groups on the topics of home charging solutions and public charging infrastructure** | |
| **Key questions:** | - What are the greatest risks/obstacles for Audi concerning the implementation?  
- What are the greatest opportunities/drivers for Audi concerning the implementation?  
- Which cooperations should Audi enter? |
| **Presentation of the results and discussion in the plenary assembly** | |
| **Central question:** | - What expectations can be derived for Audi? |
| **Wrap-up/prospect & dismissal** | |
| **Get-together & snacks** | |

We used an app to survey participants about their expectations and also involved the participants in the discussions during the event by having several live surveys.

The focus of Audi Dialog 2020 – Charging Infrastructure was on an exchange between energy industry representatives, business partners, representatives of scientific institutions, and experts from various business units of AUDI AG that are involved in aspects of charging infrastructure.

The following overarching issue was at the heart of the open dialog: What expectations do our stakeholders have concerning the topic of charging infrastructure at Audi, and what role can Audi take on for the development of sustainable solutions?

Moderation by Frank Sprenger, fors.earth GmbH

Key questions:

What are the greatest risks/obstacles for Audi concerning the implementation?
What are the greatest opportunities/drivers for Audi concerning the implementation?
Which cooperations should Audi enter?

Collect ideas – form clusters – prioritize the topics

Private charging infrastructure

Public charging infrastructure
Results of Live Survey – Charging Infrastructure*

Please evaluate the following statements

- Electric mobility will make a significant contribution to CO₂ reduction.
  - Completely disagree
  - Completely agree

- The topic of charging infrastructure is decisive for the success of a mobility transition
  - Completely disagree
  - Completely agree

- Overall, the expansion of the charging infrastructure is progressing according to the target.
  - Completely disagree
  - Completely agree

- The expansion of the charging infrastructure works only if all players consider themselves as part of an overall system and work closely together accordingly.
  - Completely disagree
  - Completely agree

- Audi makes an appropriate contribution to the electrification of mobility.
  - Completely disagree
  - Completely agree

<td>6,9</td>
<td>9,2</td>
</tr>
<tr>
<td>I liked the moderation.</td>
<td>9,2</td>
<td></td>
</tr>
</tbody>
</table>

*Assessment exclusively by external participants
Systematic thinking in mobility concepts and breaking away from existing structures are essential for the future of Audi.

Audi should enter more cooperations (e.g. with gas stations, cities, charging infrastructure operators, municipalities, and start-ups).

Commitment to developing standards (including with regard to regulated data exchange).

Sales & dealership network as an important key factor for the acceptance of electric mobility: creating positive and competent messages, overcoming obstacles.

Urban development perspective: Electric mobility should not be understood just as a new drive form. It is necessary to embed mobility concepts while looking beyond individual transport.
2. Digital Responsibility
The Program at a Glance

<table>
<thead>
<tr>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Welcome &amp; introduction</td>
</tr>
<tr>
<td>Introduction of the Audi strategy and digital responsibility</td>

</tbody>
</table>

We used an app to survey participants about their expectations and also involved the participants in the discussions during the event by having several live surveys.

With this event, we want to offer a platform for discussing the fundamental issues of digitalization. Therefore, the knowledge and experiences of other companies and institutions that deal with similar issues is of particular relevance. Political, business, and scientific representatives discuss with Audi experts the challenges and responsibility of Audi concerning the topic of digitalization.

The following overarching issue was at the heart of the open dialog: What does responsible handling of data mean for our stakeholders? Where can we use the effective potential of data processing to make a contribution to more sustainable mobility?

Moderation by Frank Sprenger, forsetearth GmbH
Our Mission:

Consistently

HOW:

- Consistently connected
- Consistently profitable
- Consistently sustainable
- Consistently synergetic
- Consistently focused
- Consistently team

Consistently electric

Consistently customer
Working Groups

Key questions:
› What do you consider to be the greatest risks/tabooes concerning this initiative?
› Where do you see opportunities and innovation and business potential in this initiative?
› How can we create trust here (cooperations, collaboration, communication)?
› How and at what time (in development) should the customer be involved?
› What expectations explicitly result from this for Audi?
Live Survey – Digital Responsibility*

<table>
<thead>
<tr>
<th>Statement</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>I understand what Audi means by the term digital responsibility.</td>
<td>3.7</td>
</tr>
<tr>
<td>Audi is too late when it comes to the topic of digital responsibility.</td>
<td>4.9</td>
</tr>
<tr>
<td>I trust the platform model and data integrity at Audi.</td>
<td>4.4</td>
</tr>
<tr>
<td>Audi should focus on the actual core business.</td>
<td>2.7</td>
</tr>
<tr>
<td>Digital responsibility is a synonym for data privacy.</td>
<td>3.9</td>
</tr>
<tr>
<td>Data privacy is always our top priority.</td>
<td>6.2</td>
</tr>
<tr>
<td>People must always be at the center when it comes to digitalization.</td>
<td>8.0</td>
</tr>
<tr>
<td>Only digitalization and technology bring us sustainable solutions.</td>
<td>5.7</td>
</tr>
</tbody>
</table>

*Assessment exclusively by external participants
Results & Insights from Audi’s View

› Incorporation of considerations for responsible handling of data in the early phases of the production decision/definition estratégic alignment

› Critical stocktaking or establishment of scope: Where does our responsibility lie at Audi? And where does our responsibility end?

› Further/more intensive involvement of external stakeholders when strategic projects reach a higher degree of maturity or before important product decisions (series production vs. stopping)

› Establishing processes and structures for responsible decisions
3. Human Rights – Complaints Mechanisms
The Program at a Glance

<table>
<thead>
<tr>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Welcome by Peter F. Tropschuh</strong>&lt;br&gt;Head of Sustainability Strategy AUDI AG</td>
</tr>
<tr>
<td><strong>Audi Insights: Complaints mechanisms</strong>&lt;br&gt;Sarah Schwellinger, AUDI AG</td>
</tr>
<tr>
<td><strong>Introduction of group work &amp; grouping</strong>&lt;br&gt;Frank Sprenger, fors.earth GmbH</td>
</tr>
</tbody>
</table>

**Break**

**Work phase in groups based on specific scenarios**
Key questions:
- What are adequate channels?
- What are the success criteria for an optimum procedure?
- What should Audi’s response look like?
- What results would need to be achieved?

**Presentation of the results and discussion in the plenary assembly**
Central question:
- What expectations can be derived for Audi complaints mechanisms?

**Wrap-up/prospect & dismissal**

As part of the human rights duty of care, Audi is responsible for establishing a complaints mechanism for the supply chain. The primary objective of the event was to structure expectations in advance based on UN guiding principles, NAP, Gerd Müller bill, with a focus on contract partners (and possibly their partners).

Representatives from politics, associations, companies, science, and non-governmental organizations discuss together with Audi experts the specific possibilities for shaping complaints mechanisms but also the overarching issue: What are legitimate/realistic expectations of Audi? What are the greatest challenges for Audi?

Moderation by Frank Sprenger, fors.earth GmbH

We used an app to survey participants about their expectations and also involved the participants in the discussions during the event by having several live surveys.
Please discuss the following key questions:

› What are the adequate channels for this scenario?
› What are the success criteria for an optimum procedure, especially following the UNGP?
› What should Audi’s response look like?
› What results would need to be achieved?

Scenario 1
Works council

Scenario 2
Truck driver

Scenario 3
Local community
## Working Groups. Complaints Scenarios

<table>
<thead>
<tr>
<th><strong>Where does the case occur?</strong></th>
<th><strong>Works council</strong></th>
<th><strong>Truck driver</strong></th>
<th><strong>Local community</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Macedonia</td>
<td>Poland</td>
<td>Residents close to the location of a first-tier supplier</td>
<td></td>
</tr>
<tr>
<td>Works council of a first-tier supplier</td>
<td>Truck driver of the subcontractor of a first-tier supplier</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Manager of a first-tier supplier</td>
<td>Managing director of a subcontractor of a first-tier supplier</td>
<td></td>
<td></td>
</tr>
<tr>
<td>First-tier supplier</td>
<td>First-tier supplier</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Who is affected?</strong></th>
<th><strong>What happened?</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Works council</td>
<td>The work of the works council is systematically hindered. Conferences are permitted only outside of working hours and access to company premises is prohibited. A member of the works council was refused a promised promotion for no reason.</td>
</tr>
<tr>
<td>Truck driver</td>
<td>Due to a massive amount of pressure exercised by the managing director, the driver systematically infringed upon his driving and rest periods. As a result of being overtired, a serious accident occurred. The driver became dependent on care and can no longer work.</td>
</tr>
<tr>
<td>Residents close to the location of a first-tier supplier</td>
<td>In the area surrounding the location of a first-tier supplier, there are an increasing number of serious respiratory diseases after the commissioning of a new plant. Small children suffer in particular. Despite repeated attempts at making contact, neither the local authorities nor the company are responding.</td>
</tr>
</tbody>
</table>
Feedback on the Event*

Results & Insights from Audi’s View

What expectations of Audi can be derived from the results?

› Integration of Preventive Risk Management and complaints mechanism is essential
  › Addressing potential complaints scenarios in advance thanks to good risk management
  › Using received complaints as input for risk management
› Granting easier access for rights holders
  › Removing technical/language (etc.) barriers
  › Involving organized representatives of interest groups
› Strengthened (regional) cooperation for processing complaints
  › Cooperation with expert organizations, for example
4. Circular Economy
The Program at a Glance

<table>
<thead>
<tr>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Welcome by Peter F. Tropschuh, Head of Sustainability Strategy AUDI AG</td>
</tr>
<tr>
<td>Agenda &amp; introduction round by Mr. Frank Sprenger, fors.earth GmbH</td>
</tr>
<tr>
<td>Presentation of the Topic of Circular Economy at Audi, Dennis-Christian Meinen AUDI AG</td>
</tr>
<tr>
<td>Survey and discussion in plenary assembly</td>

<td>Break</td>
</tr>
<tr>
<td>Work phase in groups</td>
</tr>
<tr>
<td>Presentation &amp; discussion of results</td>
</tr>
<tr>
<td>Summary, next steps, and conclusion</td>
</tr>
</tbody>
</table>

The objectives of the stakeholder dialog:
› Common understanding of circular economy in the automotive industry;
› Introduction of action areas & initiatives of AUDI AG in this area;
› Common development of new perspectives & solution approaches;
› Assessing possibilities of new partnerships & cooperations.

Format: Open discussion and group work with circular economy experts from the waste and disposal industry, business associations, chemical industry, business partners, science and research, as well as politics and civil society.

Moderation by Frank Sprenger, fors.earth GmbH

We used an app to survey participants about their expectations and also involved the participants in the discussions during the event by having several live surveys.
Exchange 2.0:

- Plastic recycled materials
- Second-life batteries
- Aluminum closed loop

Circular design

Modularity

Smart parts

Audi on demand

Global battery alliance
- Disassembly laboratory

Renewable raw materials

Water cycle Mexico
Working Groups

Key questions:
› Opportunities: What are the greatest opportunities & drivers for the implementation?
› Risks: What are the biggest obstacles to the implementation?
› Cooperations: To what extent could cross-industry and cross-sector cooperations play a role in implementation?
› Expectations: What are your expectations of Audi?

Vehicle return & recycling: There are only low incentives for OEMs to take back and recycle old vehicles in Germany.

“CE-suitable vehicle design”: There are only low incentives to design vehicles suitable for circular economy.
Live Survey Results – Circular Economy Hypotheses*

Please evaluate the following statements:

- In the automotive sector, we are right at the beginning when it comes to the topic of circular economy.
  
- It is difficult for automobile manufacturers to implement circular economy.
  
- Circular economy offers many opportunities for the automotive sector.
  
- During the course of the next 10 years, the focus will shift from the topic of “climate” to the topic of “circular economy.”
  
- Circular economy has a considerable influence on business models in the automotive sector.
  
- I consider Audi to be a pioneer when it comes to the topic of circular economy in the automotive sector.
  
- Circular economy is automatically being implemented with mobility-as-a-service.

*Assessment exclusively by external participants.
Live Survey Results – Expectations*

Please arrange the following expectations in order of importance (1. = most important aspect):

1. Entering partnerships
2. Uniting CE and climate perspectives
3. Industry solutions
4. New business models
5. Defining / acting on common steps
6. Openness (recycled material no worse)
7. Analyzing and processing the mental models of decision-makers
8. Service modules also for recycling
9. Fair distribution of benefits
10. More (market) testing of models
11. Audi keeps property
12. Clarifying responsibilities

*Assessment exclusively by external participants

Results & Insights from Audi’s View

› Strong (if applicable, even cross-industry and cross-sector) cooperations must be created; without them, a circular economy cannot be implemented.

› The open dialog must be pursued and advanced as equals in order to strengthen cooperation and develop joint models. All stakeholders have emphasized their willingness to enter a dialog.

› Circular economy and climate protection must be linked together so that mental models can be dismantled and we can come to a holistic view concerning sustainability.

› “Testing” of concepts and models must play a central role in collecting experience values and integrating new technologies/materials into processes.

“Also consider consumers as drivers”

“Take climate and resources into consideration jointly”

“Overarching added-value cooperations are necessary.”
