

## Audi Nuvolari at Goodwood Festival of Speed

- **High-performance technology and new Audi design – the supercar takes on the Goodwood Hillclimb**
- **Racing legend Tom Kristensen: “What impresses in the Nuvolari\* is the way all the systems work together – inspired by motorsports and refined for the road.”**
- **The Auto Union Lucca makes its first public appearance in motion**

**Ingolstadt/Goodwood, July 10, 2026 – At Goodwood Festival of Speed, the Audi Nuvolari\* supercar will show what it’s made of on the Hillclimb. The Audi RS 5 is also on display at Goodwood Circuit from July 9 to 12. Shown at speed for the first time, the Auto Union Lucca – a “Rennlimousine,” or racing sedan – adds a touch of history. Audi is thus highlighting the breadth of its performance expertise across road and track.**

Goodwood Festival of Speed in West Sussex, southern England, is a pivotal fixture on the international automotive and motorsports calendar. The highlight of Audi’s appearance will come when racing legend Tom Kristensen races the near-production prototype of the [Audi Nuvolari\\*](#) up the 1.86-kilometer Hillclimb in the grounds of Goodwood House, the estate of the Duke of Richmond.

“What impresses in the Nuvolari\* is the way all the systems work together – from the new quattro drivetrain and vehicle dynamics to aerodynamics and the braking system. Technologies such as the high-performance hybrid powertrain, active aerodynamics, and energy management are inspired by motorsports and have been consistently refined for road use,” says Kristensen, a nine-time Le Mans winner.

The Nuvolari\* is the fastest and most powerful production vehicle in the brand’s history – and the first to follow Audi’s new design philosophy. Just a few days ago, the supercar caused a stir when it made its [UK debut in London](#). Deliveries of the vehicle, limited to 499 units, will begin in the first half of 2027.

*\*The vehicle shown is a near-production prototype. The collective fuel/electric power consumption and emissions values of all models named and available on the German market can be found in the list provided at the end of this text.*

## **Historic icons: the Auto Union Lucca makes its first public appearance in motion**

Audi Tradition is also showcasing a number of legendary race cars from AUDI AG's historic collection at Goodwood – including models from the Le Mans and rally eras, as well as the Auto Union Type C and Type D Grand Prix cars.

With the [Auto Union Lucca](#) being driven in public for the first time at Goodwood Festival of Speed, Audi is paying tribute to a pivotal chapter in motorsports history centered on the record-breaking drives of the 1930s. The Rennlimousine is part of the Silver Arrows family. In 1935, it set a widely acclaimed flying-start mile record with a calculated average speed of 320.267 km/h. Audi recreated the Auto Union Lucca based on historical photos and technical documentation and unveiled it in Lucca, Italy – the site of the record-breaking drive – in early May.

## **Modern performance: Audi RS 5 on Goodwood Circuit**

Audi is also offering test drives in the new [Audi RS 5](#) from Audi Sport on Goodwood Circuit. The high-performance plug-in hybrid is on display alongside its historic predecessors, the Avant RS2 and the Audi RS 4 Avant.

Audi has partnered Goodwood Festival of Speed since 2025.
